

Environmental Management Policy

The basics of our environmental works.

Activities

Developing, manufacturing, marketing and selling locally produced products. We do select our suppliers who can supply a high quality components with the shortest possible distance to our company's location here in Tibro, Sweden.

Our environmental policy helps

- Shorter distances for transporting the goods, and thus minimum harmful emissions into air and nature.
- Better subcontractor control when they are close to us.
We can demand subcontractor's environmental impact.

Internal implementation

- Motivating our employees to act responsibly for the environment through education and information as well as taking the advantage of employee's engagement.
- Reducing our environmental impact at offices and manufacturing premises by managing our waste in the best way and reducing our use of energy.

Minimum Requirements

We are committed to comply with the applicable regulations and legislations as minimum requirements. .

Collaboration

The work will be conducted through collaboration with both our customers and suppliers.

Recycling

Prisma Light AB is connected to the electric circuit and EE & Battery Register.

Long-term vision

Working with a central environmental management systems with concrete plans and measurable targets that can be monitored annually by the management.
