

Flame Retardant Protection Materials

For Shipyards and Marine Outfitters, completing newbuild and refurbishment projects on time, within budget and with no setbacks is absolutely imperative, as delays can incur stiff penalties for contractors and operators if vessels aren't delivered or returned to service on schedule.

When undertaking any work on-board, it makes practical and financial sense to protect the ship's structure, fixtures and fittings to reduce the risk of accidental damage and resulting time and cost implications of unexpected repairs, cleaning and making good.

At Temprotech this is exactly how we help.

We supply a range of flame retardant protection materials that meet the exacting demands of Marine and Offshore markets during outfitting, refurbishment and repair. With over 17 years experience, we are proud to have supplied protection materials to some of the most prestigious cruise ship and superyacht projects, the most technologically advanced Naval vessels and very latest Offshore platforms.

Protecting surfaces, people and assets illustrates to stakeholders, owners and operators an enhanced commitment, awareness and responsibility from tender through to project completion.

TEMPROTECH ADVANTAGES

EXPERTISE We know our market and we know protection. And we're more than happy to pass on our advice, experience and expertise to you. We love a challenge and would welcome an opportunity to solve what you might see as a problem.

MARKET FOCUS Our origins are in the marine industry, only the marine industry, and that's where we remain today. Temprotech was established to supply yards and contractors in the UK Naval Shipbuilding programme and has developed and evolved to supply protection materials to owners, yards, contractors and outfitters in the Cruise, Ferry, Naval, Offshore and Superyacht markets around the world.

GLOBAL REACH Temprotech have developed an international network of manufacturers, logistics, agents and suppliers to provide us with truly global reach - helping to make our products and support accessible to your next project, wherever that may be.

PARTNERSHIP SERVICES Our team provides a reliable and friendly approach to developing successful protection packages and clients have come to depend on Temprotech for a range of services beyond material supply; estimating, surveying, stock management, logistics, bespoke product design and custom print. Through approved partners we are also able to access additional services to assist your next project while maintaining a single point of contact; certification and testing, material tracking, recycling and waste management, customs and import/export control.

COLLABORATION We strongly believe in and have benefitted from establishing long-standing relationships with clients. Using proven protection materials and techniques, we assure successful results. We are rightfully proud of our reputation and customer loyalty. Our existence relies upon the success of each and every project we supply and the satisfaction of our customers.
